**PLEASE READ THE LABEL BEFORE USE**

**DIRECTIONS FOR USE**

Use only as indicated.

Do not mix Kombat SWAT with any other chemical.

Mixing instructions for spraying:

Half fill the sprayer with clean water. Measure the required volume of Korn bat SWAT and pre-mix this with some water. Add this mixture to the water in the sprayer. Fill the sprayer with water to the required level and shake the sprayer well to ensure proper mixing before spraying commences. Prepared spray mixture must not be left in the spray tank for any length of time e.g. overnight.

General directions:

Kombat SWAT is a long-lasting suspension concentrate contact and stomach insecticide for the control of flies as well as cockroaches, bedbugs, fleas, fish moths, mosquitoes and ants. The length of control depends on:

- the insect species being treated,
- the level of infestation,
- the type of surface (or bed-net fabric),
- whether the treatment is applied indoors or outdoors,
- exposure to sunlight and weather conditions and,
- depending on dosage rate, months of control can be expected indoors and several weeks outdoors under favourable conditions,

Kombat SWAT spray mixture is colourless and odourless and can be used indoors or outdoors, in and around homes, factories, hotels, shops, food handling and processing establishments, hospitals, schools, dairy parlours, piggeries, stables, dog kennels, refuse dumps and similar places where high levels of hygiene are required. All spray applications must be made with suitable equipment that is in good working order and correctly calibrated to ensure the desired coverage for that particular method of application.

PEST	DOSAGE	DIRECTIONS FOR APPLICATION
MOSQUITO ADULTS	4.0-8.5 ml / 1 l water	4 - 6 weeks control can be expected. The length of control is determined by the dosage rate and the type of treated surface. (See also General Directions, under DIRECTIONS FOR USE above)  Apply as a coarse spray to surfaces where insects settle in areas where re-sprays can be done every 4 - 6 weeks. Apply to point of run-off. Use higher dose rate for longer lasting control or where infestation is severe. Repeat if necessary.
PUBLIC HEALTH: Adult house flies Adult stable flies  Also controls: Ants, Bedbugs Cockroaches (American & German), Fish moths Fleas	4.0-8.5 ml / 1 l water	Apply as a coarse spray or with a paintbrush to cracks, crevices, and any place where these insects may hide and on surfaces over which they may crawl or settle. Apply to point of run-off. Use higher dose rate for longer lasting control or where infestation is severe. Repeat if necessary.

#### DISCLAIMER

Although this remedy has been extensively tested under a large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and the effect thereof may be affected by factors such as abnormal soil, climatic and storage conditions, compatibility with other substances not indicated on the label and the occurrence of resistance of the pest against the remedy concerned as well by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for the lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.
