Do not touch eyes.</li> <li>Do not eat, drink or smoke when using this product.</li> <li>Wear impervious rubber gloves and boots, protective clothing and chemical safety goggles.</li> <li>IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>IF SWALLOWED: Get medical help.</li> <li>IF INHALED: Get medical help.</li> <li>Avoid release to the environment.</li> <li>Collect spillage.</li> <li>Dispose of content/container to suitable landfill in accordance with local regulations.</li> </ul>

### SYMPTOMS OF POISONING

Symptoms might include: abdominal cramps, anxiety, breathing difficulty, diarrhoea, dizziness & drowsiness.

### FIRST AID TREATMENT

Remove the victim from the area of exposure. Wash off remaining material with plenty of water. In the event of any complaints or symptoms, avoid further exposure and consult a doctor.

**Inhalation:** If vapours or mists have been inhaled, move victim to fresh air and remove source of contamination if safe to do so. The patient should be kept under observation. Only qualified personnel should perform administration of oxygen. Obtain medical attention if symptoms persist.

**Skin:** Move the victim to fresh air and remove all contaminated clothing, shoes and leather goods. Wash skin gently and thoroughly with cold water and non-abrasive soap. Do not rub the skin. Obtain medical attention if irritation persists.

**Eyes:** Flush eyes with clean, lukewarm water for at least 15 minutes or until the product is removed, holding the eyelid(s) open. Lift eyelids to facilitate irrigation. Take care not to rinse contaminated water into the unaffected eye or onto the face. If present, remove contact lenses after 5 minutes and continue rinsing. Seek medical attention immediately.

**Ingestion:** Do not induce vomiting unless instructed to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Have victim rinse mouth thoroughly with water. Seek medical advice immediately showing container and label.

Anticipated delayed effects: None known.

Most important symptoms/effects: None known.

RELEVANT SUBSTANCE		CONCENTRATION (%)
<b>Glyphosate (95% min) dry basis</b>		
CAS N°	1071-83-6	30.7 %
<b>Alkoxyated fatty alkylamine polymer</b>		
CAS N°	68213-26-3	<20 %

### NOTE TO PHYSICIAN

Advice to physician: There is no specific antidote available. Treat symptomatically and supportively.

**PLEASE READ THE LABEL BEFORE USE**

### DIRECTIONS FOR USE

Use only as indicated. Handle with care.

### IMPORTANT NOTES:

- Spraying directly onto, or spray drift settling on desirable plants, can result in serious injury to the plants.
- When applying KOMBAT WIPE-OUT for the purpose of soil preparation for transplant of tomatoes, or any transplanted crop with soft green stems, allow a minimum of 2 weeks to elapse between application and transplanting.
- Do not store, mix or apply KOMBAT WIPE-OUT solutions in galvanised steel or unlined steel (except stainless steel) containers or spray tanks. KOMBAT WIPE-OUT can react with such containers and produce hydrogen gas, which may form a highly combustible and explosive gas mixture.
- Store in a well-ventilated place in the original container, keeping it tightly closed and secured.
- After application, clean applicator thoroughly and dispose of wash water where it will not harm other plants. Destroy empty container and do not use for any other purpose.

### General Information:

- KOMBAT WIPE-OUT is a non-selective systemic herbicide and is only active when applied to the foliage and green bark of plants.
- KOMBAT WIPE-OUT has little or no activity in the soil. Repeated applications may be necessary to control weeds germinating from seeds.
- KOMBAT WIPE-OUT should only be applied to actively growing weeds.
- Use only clean water with no suspended soil particles in spray mixture.
- Always ensure that spray equipment is clean, free from sediments or rust.
- Ensure even droplet coverage of all weeds.
- Rain or irrigation within 3 hours of application can reduce the efficacy of KOMBAT WIPE-OUT.
- The visible effect of KOMBAT WIPE-OUT on treated foliage usually appears at 7 - 10 days after treatment but may vary according to weather conditions.

### Use restrictions:

- Spray onto target weeds only, avoid contact of spray droplets with desirable vegetation.
- KOMBAT WIPE-OUT is actively absorbed through immature bark and leaves of most plants and trees. Contact with immature bark, such as in trees younger than three years, can result in serious localised or translocated damage.
- Allow 10 days to elapse after pruning when spraying KOMBAT WIPE-OUT close to pruned trees or shrubs, in order to allow the wounds to dry completely.
- Do not spray on weed foliage covered with a layer of dust. In these situations, apply after recent rain or irrigation.

### Application guidelines:

- Use low spray pressure when spraying to avoid spray drift of fine droplets.
- Do not apply KOMBAT WIPE-OUT to weeds that are covered with dew, or in a dormant growth phase or under stress conditions e.g., moisture, heat or cold stress.
- Perennial weeds must be sprayed upon flower initiation or between mid-summer to early autumn.
- Certain perennial weeds may require follow up spraying onto regrowth.
- Sprayed plants must die off first before cultivation of the soil.
- To avoid subsequent injury to plant growth, clean application equipment and protective equipment thoroughly immediately after spraying by thoroughly flushing with water.

### GARDEN, HOME & SMALL HOLDER APPLICATION INSTRUCTIONS:

One Liter of spray mixture must be sprayed on an area covered with weeds of not less than 10 m<sup>2</sup>. A spray solution of 1 % [10 ℓ of spray mixture] should be sufficient to control weeds in a 100 m<sup>2</sup> area.

### Dilution rates:

% DILUTION	KOMBAT WIPE-OUT	WATER
1.0 %	10 mℓ	990 mℓ
1.5 %	15 mℓ	985 mℓ
2.0 %	20 mℓ	980 mℓ

#### DISCLAIMER

Although this remedy has been extensively tested under a large variety of conditions the registration holder does not warrant that it will be efficacious under all conditions because the action and the effect thereof may be affected by factors such as abnormal soil, climatic and storage conditions, compatibility with other substances not indicated on the label and the occurrence of resistance of the pest against the remedy concerned as well by the method, time and accuracy of application. The registration holder furthermore does not accept responsibility for damage to crops, vegetation, the environment or harm to man or animal or for the lack of performance of the remedy concerned due to failure of the user to follow the label instructions or to the occurrence of conditions which could not have been foreseen in terms of the registration. Consult the supplier in the event of any uncertainty.
